Best Practices of 2023-24

Government Sanskrit College Tripunithura conducted different practices during 2023-24. The institution organized several activities such as clean campus campaigning, gardening, making a Picture wall in the adopted school by the NSS Unit, etc. are prominent among them. Two programs which we suggest as our best practices are as follows -

1. **Nakshatravana Program** - There is a common concept that every birth star is related to a particular tree. This concept is directly related to Ecological preservation. The program is initiated in the college by Dr. A.B. Indulekha, Assistant Professor, in the Department of Vyakarana. Trees were planted and protected to bring back the greenery of the campus which was lost during the construction period.

2. Sastropshini- An initiative for achieving proficiency in Vakyartha - The traditional Sanskrit version of debate in Sastra subjects - The uniqueness of this institution lies with the prestigious Sastrasadas which is conducted every year during the December 27-29. Our students also participate in the program. With a vision to improve their ability in debate, we organize training programs for them on every Friday. Teachers give proper instruction to students to prepare and present the Vakyartha in different sastras.
